

NOW HIRING

Primary Care Provider, HIV Specialist, LGBTQ+ Health Specialist (MD, APRN, DNP, DO)

ABOUT US:

Founded in 2011, Circle Care Center (CCC) is Connecticut's largest independent provider of stigma-free sexual health and LGBTQ+-affirming medical services. CCC now serves more than 3000 patients annually across its two clinical locations in Norwalk and Glastonbury and operates an in-house pharmacy at its Norwalk location. Circle Care Center's mission is to provide the highest quality medical care to its patients in Connecticut, specializing in primary care for people living with HIV and the LGBTQI+ community, as well as HIV prevention (PrEP & PEP), Hepatitis C, and STI testing and treatment, Gender-Affirming Care, and Behavioral Health Services.

SUMMARY:

Circle Care Center is seeking to hire a new primary care provider for its Norwalk, CT location. A specialty in internal medicine with experience in primary care settings is preferred but not required. All providers with the credentials of MD, APRN, DNO, or DO will be considered. Preference is for providers who are experienced in gender-affirming care and working with members of the LGBTQ+ community, and more specifically in primary care for people assigned female at birth. Providers work under the supervision and guidance of the Senior Medical Director, who is the onsite Medical Director of its Norwalk, CT location.

Requirements

1. Ability to give full attention to what other people are saying, and to use logic and reason to identify the strengths and weaknesses of alternative solutions;
2. Ability to identify complex problems and review related information to develop and evaluate options and implement solutions;
3. Ability to monitor or assess the performance of yourself, other individuals, or the organization to make improvements or take corrective action.
4. Maintain a professional and positive working relationship with patients, medical staff, other co-workers, and the public.

Typical Duties

A. Assessment of Health Status

1. Obtains and accurately documents a relevant health history for adolescents and adults in their respective phases of the individual and family life cycle.
2. Performs and accurately documents complete, system, or symptom-specific physical examinations on adults (including developmental evaluations, physical system evaluations, and behavioral evaluations for each group).
3. Assesses the impact of family, community, environment, home, economic, work, and school environments on an individual's health status.
4. Performs screening evaluations for mental health, substance abuse, and violence.
5. Distinguish between normal and abnormal change with aging.
6. Assesses adolescents and adults throughout the stages of chronic illness.
7. Assesses for common occupational, home, and recreational exposures that affect health.
8. Assesses the effect of illness and/or injury on the individual:
 - a. Functional status.

- b. Ability to work or return to work/school.
 - c. Physical and mental status.
 - d. Social relationships.
9. Assesses the changing impact and reciprocal effects of acute illness and known chronic health problems in adolescents and adults.
 10. Analyzes the multiple effects of pharmacologic agents, including over-the-counter (OTC) preparations and folk remedies, in adolescents and adults with multiple health problems.
 11. Works with the pharmacy staff to determine any adverse events that may occur with the patients retrospective and current medication regimen.
 11. Assesses the impact of family transitions, such as death, divorce, marriage, employment, and retirement, on the health issues of adolescents and adults.
 12. Distinguishes ethnic and gender differences in the presentation and progression of common acute and chronic health problems in adolescents and adults.
 13. Assesses and evaluates vague or ill-defined symptoms in adolescents and adults.
 14. Assesses for psychological manifestations of health problems in adolescents and adults.

B. Diagnosis of Health Status

1. Discriminates among multiple potential mechanisms causing signs and symptoms of health problems commonly diagnoses in adults and adolescents.
2. Identifies both typical and atypical presentations of commonly occurring health problems in adolescents and adults.
3. Differentiates between signs and symptoms indicating exacerbation and/or remission of a chronic health problem and signs and symptoms of a new problem in adults and adolescents with known health problems.
4. Diagnoses commonly occurring complications of chronic health problems, including psychological/mental health manifestations.
5. Diagnoses commonly occurring acute and chronic health problems in adolescents and adults with an emphasis on multi-system health problems.
6. Diagnoses common mental health and substance abuse problems such as anxiety, depression, obesity, alcohol, and drug abuse.
7. Construct appropriate differential diagnoses for further investigation or referral in adolescents and adults who present with ill-defined health problems.
8. Recognizes the health impact of multiple demands on adults, such as career, family, parenting, relationships, and finances.

C. Plan of Care and Implementation of Treatment

1. Participates in the development and implementation of health promotion programs for adolescents and adults.
2. Designs health maintenance and disease prevention interventions for adolescents and adults.
3. Provides age-relevant health promotion that reflects an understanding of gender differences in adolescents and adults.
4. Incorporates prevention for work-related risks and exposures in the plan of care.
5. Provides secondary and tertiary preventive interventions to adolescents and adults with multiple and/or chronic health problems.
6. Manages commonly-occurring acute and chronic physical and mental health problems in adolescents and adults to promote health, function, and quality of life and reduce disability and complications.
7. Plans for long-term management of common health problems in adolescents and adults.
8. Treats common complications of chronic and/or multi-system health problems in adults and adolescents.

9. Promotes self-care by adolescents and adults within the constellation of the family and/or support system and facilitates their participation in care when appropriate.
10. Evaluates the response of both the individual and the family to the health care provided.
11. Evaluate the patient's and/or caregiver's support systems.
12. Performs common primary care procedures, including, but not limited to, suturing, microscopy, and pap tests.
13. Advocates for the patient's/family's rights regarding decision-making as appropriate regarding durable power of attorney, advance directives, and other related issues.
14. Facilitates the patient's transition between health care settings, such as home to hospital or nursing home and provides for continuity of care.
15. Applies research that contributes to positive change in the health care delivered to adolescents and adults.

D. Teaching and Coaching Function

1. Develop, with the patient, interventions appropriate to the patient's needs and values.
2. Demonstrates effective communication skills in addressing sensitive topics with adolescents and adults such as sexually related issues, substance abuse, violence, death, mental health, and other related problems.
3. Negotiates behavior/lifestyle changes with adolescents and adults and supports adoption of healthy behaviors.

E. Professional Role

1. Promotes comprehensive care and continuity of care in both primary care and specialty practice.
2. Recognizes the importance of participation in community and professional organizations that influence the health of adolescents and adults and supports the role of the adult nurse practitioner.
3. Interprets the adult nurse practitioner role in primary and specialty health care to other health care providers and the public.
4. Serves as a resource in the design and development of adult community-based health services.

Qualifications

1. Qualifying degree such as MD, APRN, DNP, or DO
2. Licensed by the State of Connecticut to practice as a medical provider.
3. Experience with STI treatment and prevention and/or gender-affirming care
4. Experience in providing primary care to people assigned female at birth.
5. Advanced cultural competency when working with patients in the LGBTQ+ community.
6. Current and Bi-Annual certification of Basic Life Support/AED
7. Must have excellent communication skills
8. Maintenance of continuing educational hours annually
9. Ability to use various computer systems, including an Electronic Health Record
10. A passion for the LGBTQ community, health care, and social justice issues

Work Conditions

Constant standing or walking is required. Manual dexterity is required for sustained periods.

Compensation

Circle Care Center provides generous and fair compensation to its providers based on fair market value analysis. Provider compensation may range between \$140,000 – \$175,000, depending on credentials and experience. Benefits include but are not limited to medical, dental, vision, short and long-term disability, life insurance, FSA, and 403b retirement savings.

To apply please submit your resume and cover letter via to the organization's CEO, Anthony Crisci, at acrisci@circlecare.org.
